

Game Mechanic

"Isneyk" is a 3D remake of the original 2D snake game. At the start of the game there is a food already at your side, this is the bonus the moment the game start. The snake character moves forward continuously and can be controlled by using A/D or Left and Right arrows. Foods spawn at random coordinates within the map after the player ate the previous food, it also moves away from the snake character for it to have challenge and it has a movements speed of 6. Besides foods, there are two powerups, the magnet and the food multiplier. The magnet sucks the food that is trying to escape and the food multiplier multiplies the food at random with a total of 5 as maximum count of food to be added to the map. The game will end the moment the head bit its body or if it crashed into the wall.

Player Mode Application

"Isneyk" is a single player 3rd person point of view game that offers a challenging version of the original snake game.

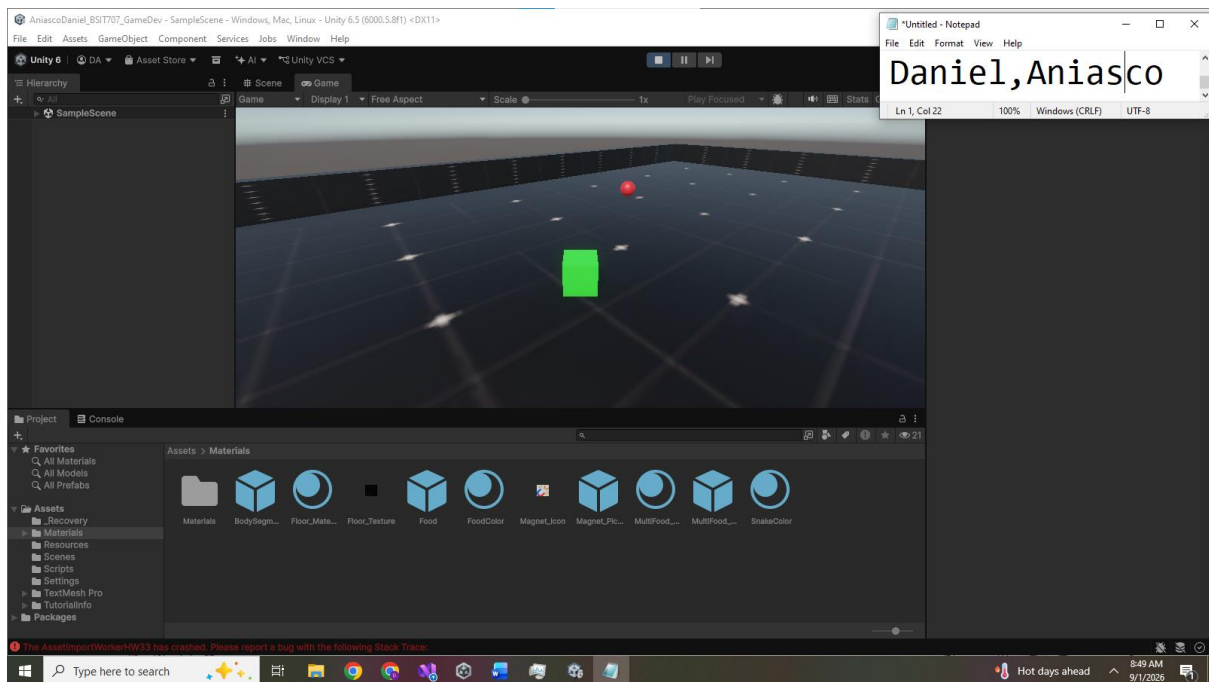

Time Interval

This game is a real-time game as the updates the progress the moment the snake eats the food or powerup. It also ends the game if it hits the wall and bite its body.
